Talent Snapshot® Announces New BizLibrary Agent
Talent Management LLC and CES Combine Forces

CINCINNATI, OH — Talent Management LLC is happy to announce that they have signed an Agent agreement with Consolidated Employer Services in Columbus, Ohio.

As a result, CES can now offer the The BizLibrary Collection through BizLibrary's online learning platform to their clients. CES clients will have access to over 10,000 courses in a variety of formats and styles to meet the diverse learning preferences of the modern workforce. For an annual fee, subscribers will have UNLIMITED access to any courses in the Collection without the typical large, recurring, upfront financial commitment.

The BizLibrary Collection, curated by experts, includes high-quality, short, video-based lessons covering topics important to today's workforce, such as Sales, Human Resource Compliance, Workplace Safety and more.

CES is a Human Resources Administrative Services Organization or ASO. They perform ASO duties which saves business owners time and money through economies of scale. Many times, small businesses or start-up companies, are not prepared for the HR administrative duties involved with running a business. CES fills that gap.

"We are excited about this partnership with CES. Now their clients can benefit from the development opportunities BizLibrary can offer employees. Soft skills development is gaining traction as a priority for all employees, with micro-learning leading the way." said Jackie Messersmith, President.

About Talent Snapshot®

Talent Snapshot's mission is to help our clients *engage employees and get results*. We achieve this by using the most validated, predictive competency management content in the marketplace today – over 40 years of research – as the framework for our talent management solution. This enables users to target the right skills for improvement and set meaningful goals that help organizations align business and talent strategies. As a result of our “built from scratch” talent management solution, users interact with integrated, unique and powerful functionality, along with a better user experience. We make talent management simple.
